Clarification:

- The fence locations will be underneath the bridge deck and attached to the abutment surfaces (Abuts. 1 & 10, east and west ends of bridge). So, 2 separate fence locations are required.
- 2. Traffic control in accordance with MODOT guidelines and MUTCD (Manual of Uniform Traffic Control Devices) shall be exercised at all times. Any access, equipment staging, or material loading and unloading that the contractor deems necessary from the roadway surface shall follow the above guidelines. Traffic Control measures are the responsibility of the contractor. Any scheduling of shoulder and/or lane closures shall be closely coordinated with the Engineer. The Engineer shall be notified at least 72 hours in advance of anticipated closures or traffic disruptions for any reason.

THIS PAGE MUST BE SIGNED AND RETURNED WITH ORIGINAL RFQ
